

Report

1 Problem Description

2 Framework of STAPpp

2.1 Preprocessing

2.2 Formation and assembly

2.3 Solver

2.4 Postprocessing

3 Basic elements

Note. In this section, the elements used in the bridge test are introduced.

3.1 Bar

...

3.2 8H

3.3 Beam

3.4 Shell

4 Other elements

4.1 3T

...

4.2 4Q

...

4.3 Timoshenko Beam

4.4 Plate

5 Advanced features

5.1 Sparse solver

5.2 Post buckling

...[1]

5.3 Other strategies for optimization

6 Acknowledgement

Thank the other teams for their enhancing our confidence. ($\overline{\mathbf{T}}^*$)

A Input format

B Assignment
